1. INTRODUCTION

Figure 1 was automatically generated using showyourwork with minimal instructions from the user. By labeling the figure with \label{fig:mandelbrot}, the user informs showyourwork that there exists a script in the figures directory called mandelbrot.py that generates the figure files included within that figure environment. This behavior can be changed or overridden by specifying custom rules in the Snakefile.

Figure 1. A sample plot generated from a Python script in the figures directory, showing the Mandelbrot set. The name of the script is automatically inferred from the figure label in the TeX file.
